REASONS FOR ALLOWANCE

Claims 1,3-9,11,12,14-21,23-25,28-41,43-49,51,53-66,69-78,80-90,92,93 and 95-113 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention differs over the prior art, due to the combination of features disclosed in the allowed claim. First the present invention operates wirelessly from a wireless mobile information apparatus, which as described in the specification is a PDA. This device first searches for compatible output devices without using a server to connect to them. Then the possible devices that can be selected are displayed upon the device for the user to select which device that they wish to connect to as opposed to previously selecting the type of devices before searching or previously pairing with that particular device. Once the device is selected the user is able to output to the device without having to use a device specific device driver. This ability to output to a device as described in the specification as a printer with out a driver, differs from the prior art in that the prior art operates using a specific device driver for the device type such as a driver for laser printer or inkjet printer which the presently claimed invention is able to operate without.

Therefore for the discussed reasons the present invention overcomes the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See attached Notice of references cited (if appropriate).
